

For Release: 10 March 2010

**FINDERS RESOURCES LIMITED (ASX & AIM Code: FND)**

**Change of financial year-end**

Finders Resources Limited ("Finders") advises that the Australian Securities and Investments Commission has granted the Company approval to change its financial year-end from 30 June to 31 December so as to align the balance dates of companies in the group. The change is effective from 31 December 2009 and the first financial report following the change will be for the six months ended 31 December 2009. The financial report will be released on 16 March 2010.

***Background on Finders Resources***

Finders, listed on AIM and ASX, is the operator of the Wetar Copper Project (~94% owned and earning), and the Ojolali Gold-Silver Project (72% with option), both located in Indonesia.

At the Wetar Project, as part of a definitive feasibility study, a demonstration SX-EW plant with 5t per day copper cathode capacity was commissioned in February 2009 and is permitted to process 100,000t of ore from the Kali Kuning deposit. The demonstration plant is producing LME Grade A copper cathode at planned rates. The Company is targeting commercial production of 20-25,000 tonnes per year cathode, subject to final feasibility, permitting and project funding.

At the Ojolali Project, Finders controls what it considers to be a major new epithermal gold district, and has been undertaking an extensive exploration program comprising detailed drilling to establish an initial mining resource, supported by extensive surface geophysical and geochemical surveys. Finders believe that the Ojolali project has strong potential to generate cash flow through open pit CIL/CIP development of the gold resource at the Jambi Oxide gold deposit.
